

SUPERWOMAN

LANA LANG

KRYPTONIAN ENHANCEMENT

Superwoman has the species of Kryptonian in addition to what is listed on this card.

When Superwoman rolls defense dice against a normal attack from a figure that is not a Kryptonian, add one automatic shield to whatever is rolled. When Superwoman would be affected by a glyph or special power, you may ignore her species of Kryptonian.

MAGNETIC MANIPULATION

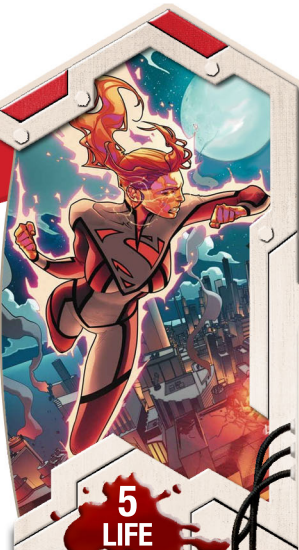

SPECIAL ATTACK

Range 4, Attack 4.

Before the defending figure rolls defense dice, you may place it on an empty space within X spaces of its current placement, where X is equal to the number of skulls you rolled. It will not take leaving engagement attacks. After attacking with this special attack, if at least one blank was rolled, you may choose a figure adjacent to the defending figure to receive one wound.

ELECTROMAGNETIC LIFT

Before taking a turn with Superwoman, you may choose a friendly figure within 4 spaces of Superwoman, or two if one is Human. Place each chosen figure on an empty space within 1 space of its current placement. Figures moved by Electromagnetic Lift do not take leaving engagement attacks.
